Petition RBKC for more street benches in North Kensington

In North Kensington the wards of Colville, Dalgarno, Golborne, Norland, Notting Dale and St. Helen's have a significant number of residents over the age of 65 years and a high percentage of residents with long term limiting illness (Public Health England 2017). In these wards a cause of concern for many residents with restricted mobility is the lack of street benches. We, the undersigned residents of Kensington & Chelsea, request that the Council consider this Petition at a full council meeting and makes resources available to install benches in these six wards in consultation with local residents and groups representing the interests of those with restricted mobility and sets out a timescale for the implementation of this project.
